

FLOOR CLEANER SUPRACLEAN 200

Description:

SUPRACLEAN 200 Floor Cleaner is a condensed product for cleaning wooden floors.

Use:

The Floor Cleaner SUPRACLEAN 200 is recommended for cleaning floors protected with SUPRACLEAN 300 and 400 Care Agents. It removes contamination and fat, while preserving the protective film of the care product.

Procedure:

Pour 50-100 ml (depending on contamination) of the SUPRACLEAN 200 into a bucket of water. Wash the surface with a wringed-out flat cleaning mop. High water temperature improves the cleaning effectiveness. It is recommended to use two buckets. One bucket contains a solution of water and cleaning agent and the other contains hot water for rinsing the mop after cleaning a fragment of floor with solution. Immerse the rinsed mop in the bucket containing SUPRACLEAN 200 cleaning solution, wring it out and wipe the next floor fragment. This "two-bucket system" helps avoid streaks on the floor and improves cleaning effectiveness.

Colour:

Milk-white

Scent:

Gentle, hardly noticeable

Capacity:

50-100 ml/10 l (bucket) of water

Storage conditions and shelf life:

24 months from date of manufacture at a temperature higher than 5°C.

Packaging:

Canister 1 l.
