

REMOVER SUPRACLEAN 100

Description:

SUPRACLEAN 100 Remover is intended for the removal of the protective film, and dirt and fat contamination.

Procedure:

This product is a concentrate. It should be diluted with water in the proportion of 1:2. Apply a thin layer with a flat mop (micro fibre). Wait for 2 minutes and wipe the surface with a mop wrapped with a cleaning and wiping cloth. Next, clean the entire surface with a mop (micro fibre) rinsed in hot water without any washing agents. To remove a thick layer of protective coating, it may be necessary to repeat this procedure. Another protective coating may be applied after 2 hours. If no protective coatings are applied, wait for 2 hours to be able to use the floor normally.

Colour:

Milk-white

Scent:

Noticeable.

Capacity:

65 ml/m²
